Vision: Better eHealth → Better Health

- The high level vision for CE LHIN eHealth program is
 - Better eHealth → Better Health
- How does this vision translate for the Meditech 6.0 Consolidation Initiative?
 - Goal for this initiative is a shared and fully capable electronic health record for the citizens of the CE LHIN
 - Exciting opportunity to inform and enhance practice

What Will This Initiative Mean for CE LHIN Clinicians?

- Opportunity to create a leading edge system based on clinical best practice and that promotes patient safety
 - System designed by clinicians to provide best possible care.
- Ability to create a comprehensive and patient-centric electronic medical record.
 - Inter-professional care is promoted by integrated documentation tools and processes.

What Will This Initiative Mean for CE LHIN Clinicians?

- Elimination of Duplication
 - Enter information once....and use of information by many.
- Standardization of Languages and Methodologies
 - Example, standardization of clinical documentation nomenclatures and methodologies.

What Will This Initiative Mean for CE LHIN Clinicians?

- Workflow redesign
 - LEAN process improvement opportunities.
- Easier access to critical clinical information
 - Information sharing becomes easier.
