Ontario Reducing Carbon Footprint, Boosting Care at Hospitals in Scarborough

Energy Savings to be Reinvested in Patient Care

November 29, 2017

NEWS

Ontario is investing in hospitals to improve energy efficiency, reduce greenhouse gases and redirect savings into patient care across the province.

The Hospital Energy Efficiency Program will help hospitals save energy and encourage the use of more renewable energy technologies. Scarborough and Rouge Hospital is receiving more than \$420,000 in funding for three energy-efficiency projects.

This year, Ontario is funding 180 projects at 98 hospitals across the province, including 117 heating, ventilation and air conditioning projects, 35 lighting projects and 28 projects that address other energy efficiency needs at hospitals. As a result of these and other improvements, almost five megatons of carbon dioxide equivalent gases are expected to be eliminated from the environment by 2050, the equivalent to taking about 40,000 vehicles off our roads. By 2020-21, it is estimated that we can generate over \$60 million in annual energy-related savings and sustain those savings on an annual basis for 20 years.

This program is an initiative of the Climate Change Action Plan and uses proceeds from Ontario's carbon market to modernize facilities such as hospitals, universities, and heritage buildings.

Improving patient care at hospitals across the province is part of Ontario's plan to create fairness and opportunity during this period of rapid economic change. The plan includes a higher minimum wage and better working conditions, free tuition for hundreds of thousands of students, easier access to affordable child care, and free prescription drugs for everyone under 25 through the biggest expansion of medicare in a generation.

QUOTES

“The Hospital Energy Efficiency Program is another example of the government's commitment to reducing the environmental impact of our health care system. These new investments will help ensure hospitals can focus on helping patients get timely access to appropriate, high-quality health care within a sustainable system.”

— Dr. Eric Hoskins, Minister of Health and Long-Term Care

“Ontario's actions to help hospitals fight climate change and improve energy efficiency will reduce greenhouse gas pollution, increase patient comfort and redirect savings into patient care across the province. Our Climate

Change Action Plan and carbon market are working together to help reduce greenhouse gas pollution and save energy costs while ensuring a cleaner, healthier and more prosperous low-carbon future for all Ontarians.”
— Chris Ballard, Minister of the Environment and Climate Change

“I am very proud of this investment of more than \$420,000 for Scarborough and Rouge Hospital to help reduce greenhouse gas emissions. The resulting energy-related cost savings will be reinvested to continue the high level of patient care that residents in my riding of Pickering-Scarborough rely on.”
— Tracy MacCharles, MPP Pickering-Scarborough East

“The Hospital Energy Efficiency Program symbolizes the province’s commitment to good health and well-being of all Ontarians. This significant investment of more than \$420,000 towards energy-efficiency in the Scarborough and Rouge Hospital will priorities improvements to its facilities and enhance the quality of health care services it provides to Scarborough-Guildwood residents. The resulting energy-related savings will be restored into patient care to ensure that Scarborough-Guildwood residents continue to have access to timely and superior health care services.”
— Mitzie Hunter, MPP Scarborough-Guildwood

“Projects of this nature can be difficult for hospitals to fund locally, for our three hospitals we are exceptionally grateful to our provincial health partners for this generous investment to help us improve the energy efficiency of our sites.”
— Elizabeth Buller, President and CEO, Scarborough and Rouge Hospital

“The Central East LHIN was pleased to work with Scarborough and Rouge Hospital and to endorse projects that could be supported through the Hospital Energy Efficiency Program (HEEP). Not only will this investment allow Scarborough and Rouge Hospital to improve the energy efficiency of its facility, but savings will be reinvested back into patient care so that local residents can continue to live healthier at home.”
— Deborah Hammons, CEO, Central East LHIN

QUICK FACTS

- Ontario is investing \$64 million this year in the Hospital Energy Efficiency Program.
- HEEP investments in other hospitals in the area include: \$5.3M for Lakeridge Health Ajax-Pickering Hospital
- As part of the [2017 Budget](#), Ontario is also spending an additional \$9 billion for new hospital projects, bringing the total planned investment in hospital infrastructure to more than \$20 billion over the next 10 years.
- Ontario is making the largest investment in hospitals, schools, public transit, roads and bridges in the province's history – more than \$190 billion in public infrastructure over 13 years, starting in 2014-15. To learn more about what's happening in your community, go to Ontario.ca/BuildON.
- The Climate Change Action Plan and carbon market form the backbone of Ontario's [strategy](#) to cut greenhouse gas pollution to 15 per cent below 1990 levels by 2020, 37 per cent by 2030 and 80 per cent

by 2050. The government will report on the plan's implementation annually and review the plan at least every five years.

- Ontario's carbon market proceeds will be invested into projects that help families lower their energy costs and save money.
