

CLINICAL SERVICES PLANNING PROJECT VENDOR ANNOUNCED

Central East LHIN bringing together key players to plan for one “acute care network”

NEWS

June 4, 2008

The Central East LHIN’s Clinical Services Planning (CSP) Project has started and Deloitte has been selected as the consultants to support the project’s Steering Committee.

The project, which will take six to nine months to complete, will focus on creating a hospital clinical services framework and bringing forward plans for the delivery of selected surgical and medical services where issues of quality and access are of greatest concern.

The Central East Community Care Access Centre is the Health Service Provider Sponsor for the project and, as a member of the Steering Committee, is providing contract oversight and administrative support.

QUOTES

“Residents of the Central East region should know that when they walk through the door of their local health care facility they have access to the full network of services provided across the LHIN,” said Foster Loucks, Chair, Central East LHIN Board of Directors. “The Steering Committee and Deloitte will work together to develop plans to meet this goal in partnership with health care providers and local residents.”

“This is a bold and important step being taken by the CE LHIN designed to put the right providers in the right places with the right supports to meet the needs of the citizens of the Central East,” said Don Ford, Executive Director, Central East Community Care Access Centre. “The CECCAC is pleased to be contributing along with our health service colleagues in this review.”
